

# Climate Smart Farming Forum

6th May 2021 10.30am-4.30pm

## Topics include

- Sustainable livestock production in a changing climate
- Soil health
- Regenerative agriculture in action
- Water and weather
- Biodiversity and ecosystem services on-farm

With a focus on graziers, this forum will feature local farmers plus experts discussing how you can farm smarter in the future

Resilient Hills & Coasts is a collaborative project focussing on the delivery of a regional climate change adaptation plan and related climate-focussed activities for the Adelaide Hills, Fleurieu Peninsula and Kangaroo Island regions of South Australia. The project aims to strengthen the resilience of our communities, economies and the natural environment to respond and adapt to the changing climate.

This project is supported by the Hills and Fleurieu and Kangaroo Island landscape boards through the landscape levies, and through funding from the Australian Government's National Landcare Program.

**Venue:** Eat at Whalers, 121 Franklin Parade, Encounter Bay

**Costs:** \$20 earlybird (until April 10), \$30 full fee. Free bus and ferry for KI farmers (book by April 22).

**Bookings:**
