

Osborn's eyebright

Scientific name: ***Euphrasia collina* ssp. *osbornii***

National status (*EPBC Act 1999*): **Endangered**

South Australian status: (*NPW Act 1972*): **Endangered**

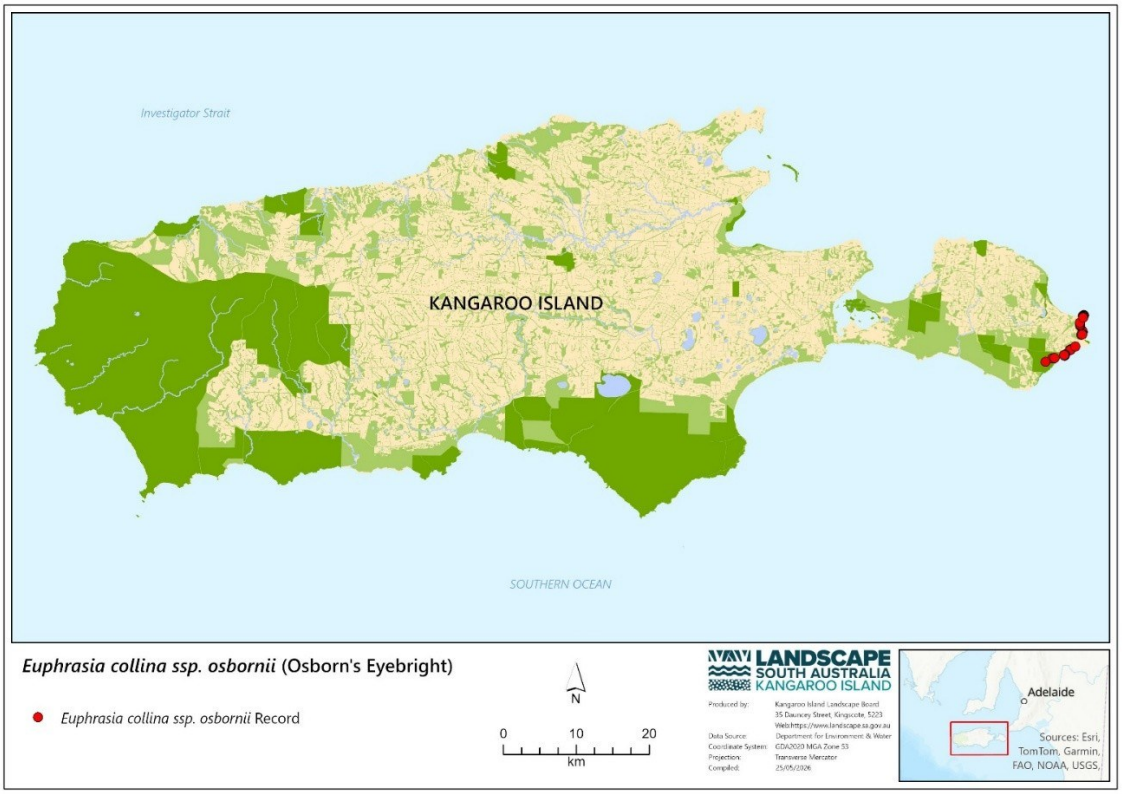

Description:

Perennial herb. Upper leaves pale green to red-brown, to 12 mm long and 9 mm wide, with 3-6 pairs of teeth. White to pink or lavender flowers, paler inside, sometimes with a yellow blotch behind the lowest lobe. Flowering between August and December.

Distribution:

Endemic to South Australia including Kangaroo Island, Yorke Peninsula, Mount Lofty Ranges and the upper South-east. On Kangaroo Island it grows within coastal clifftop heath at the eastern end of the island.
