Our vision

Leading the way to biodiverse and productive landscapes in a changing climate

Regional priorities	Our focus areas
<div style="display: flex; align-items: center;"> <div> <p style="margin: 0;">CLIMATE RESILIENT REGION</p> <p style="margin: 0;"><i>Resilient landscapes, communities, and enterprises are mitigating and adapting to climate change</i></p> </div> </div>	<ul style="list-style-type: none"> • Ensure climate risk is embedded in all board business • Provide land managers and community with the knowledge and skills they need to prepare, mitigate and adapt to climate change • Explore adaptation pathways to ensure landscapes and communities are climate resilient
<div style="display: flex; align-items: center;"> <div> <p style="margin: 0;">PEOPLE AND PARTNERSHIPS</p> <p style="margin: 0;"><i>People and community are central to looking after our landscapes</i></p> </div> </div>	<ul style="list-style-type: none"> • Support First Nations partnerships for cross-cultural knowledge sharing and fostering Healthy Country outcomes • Foster a shared responsibility for landscape stewardship • Raise awareness of the region's natural, heritage, and cultural values • Support community action to achieve land, water and coastal management outcomes • Foster, build and maintain strategic partnerships and investment to manage the regions natural resources
<div style="display: flex; align-items: center;"> <div> <p style="margin: 0;">WATER MANAGEMENT</p> <p style="margin: 0;"><i>The region's water resources are managed judiciously</i></p> </div> </div>	<ul style="list-style-type: none"> • Plan, research & leverage infrastructure investment to support the judicious use of groundwater • Support the hydrogeological monitoring of Great Artesian Basin springs and other groundwater resources • Understand and manage surface water systems including the Lake Eyre Basin
<div style="display: flex; align-items: center;"> <div> <p style="margin: 0;">ADAPTIVE LAND MANAGEMENT</p> <p style="margin: 0;"><i>Land management practices protect soil, vegetation and biodiversity</i></p> </div> </div>	<ul style="list-style-type: none"> • Reduce the impacts of pest plants and animals on production systems • Reduce excessive grazing pressure across all land uses • Build land managers' capacity in adaptive climate smart agriculture, best practice land management and rehabilitation • Build knowledge of practices that protect soil health and function
<div style="display: flex; align-items: center;"> <div> <p style="margin: 0;">PROTECTING AND ENHANCING BIODIVERSITY</p> <p style="margin: 0;"><i>Intrinsic biodiversity values are protected and enhanced</i></p> </div> </div>	<ul style="list-style-type: none"> • Manage and monitor key threats to identified priority natural and Cultural species and places • Support threatened species and ecosystem recovery • Partner to maintain and improve the condition of the Great Artesian Basin and water-dependent ecosystems

Winninowie Conservation Park looking out to Yatala Harbour
Upper Spencer Gulf Aquatic Reserve, Nukunu Country
